---

Hi everyone,

Attached is a revised C protocol based on what I've heard from some of you, my crew and Duncan. In addition, I've included our field data sheet and some powerpoint slides/flowcharts that we use to guide our lab to processing. Probably the biggest confusion for my students seems to be when to collect a sample for moisture content. So I've included a slide on that.

A quick note: Do ocular estimates and clipping on the 0.5 x 0.5 m plot. This was a mistake in the earlier draft.

cheers,
