---

Hi Everybody,

To follow up on the Tier 2 intensive site selection discussion, I propose the following sites for the northern subregion:

Unique ID (see the Excel worksheet circulated by Andy): 180601, US-NC2, 181101 (or CPCD96\_14).

Everyone whose work may depend on the information gathered from these, please feel free to comment. Speak now (lets make it within 2 weeks) or forever hold your peace.

Thank you,  
Asko

All,

I have attached a map showing the Tier II selections and allocation to each sub region. Before you start counting dots here is the breakdown: TA&M-OSU = 35, UF = 28, UGa-AU = 33, VT – NCSU = 31.

The attached spreadsheet has the info on the selected sites and culled sites in a separate sheet. Reminder: the target is for each subgroup to do 30 sites total.

FBRC – I need lat and lon for two of your sites so I can put them on the map (see spreadsheet).

Asko – please send me the info (lat and lon at least) for your two Ameriflux sites as in the spread sheet.

This is just a first cut, if any groups want to trade sites due to logistics please let me know and we can update the spreadsheet and map.

Thanks,
